

Major Projects Portal

The Chamber created the Major Projects Portal as a way to connect local suppliers and workers with prime contractors seeking services and supplies for their major projects in the Campbell River area.

The Major Projects Portal is a proven success in the John Hart Generating Station replacement project. This project has utilized the most local resources ever used in BC Hydro history in a single project.

The screenshot shows the website's header with navigation tabs: OVERVIEW (Site introduction & policies), PROJECTS (Project listings), SUPPLIERS (Information & profile listings), COMMUNITY (Community info & resources), and NEWS (News, media & events). Below the header is a breadcrumb trail: Major Projects > Welcome to Major Projects: Campbell River. The main content area is titled "Welcome to Major Projects: Campbell River" and features three columns: "OPPORTUNITIES" with links to JHGS Anticipated Hiring Needs, Comox Valley Hospital - Trade Tender Matrix, and Campbell River Hospital - Trade Tender Matrix; "LATEST NEWS" with links to JHGS Construction Update #36, NIHP News Release July 05 2016, NIHP Aboriginal Week, NIHP News Release June 1, 2016, and JHGS Construction Update #35; and "EVENTS" with a link to All Events and a note "No current events." To the right of these columns is a large text block welcoming visitors to the site, explaining its purpose and providing instructions on how to use the site's search and registration features. At the bottom right, there are two prominent buttons: "SUPPLIER REGISTRATION" and "LOCATE A SUPPLIER", with an aerial photograph of a construction site below them.

What is the Portal?

It is a searchable database that is utilized by large contractors to access local resources.

Why is it important?

It gives easy access to local resources so the major bid proponents are more likely to hire and buy locally than outsource resources.

Why should I join?

You should join because a profile with the Major Projects Portal gives your business a chance to compete for contracts and jobs for the major projects in the Campbell River area.
